DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joe Holland on Aug 2, 2005.

The application has been amended as follows:

a) Please replace claim 23 as follows:

23. A method for adaptively adjusting parameters of a timing loop, the method comprising the step of:

measuring a current frequency error of a clock signal of a receiver,
thereby providing a first value indicative of the current frequency error;

determining a second value indicative of an average of frequency error of
the clock signal over time;

combining the first and second values, thereby providing a combined
value;

comparing the combined value to a threshold; and

adaptively adjusting, based on the comparing step, parameters of a timing
loop of the receiver.

Allowable Subject Matter

2. Claims 1-20 and 23-24 are allowed.
3. The following is an examiner's statement of reasons for allowance:

None of prior art teaches or suggests a timing loop adjusting system as the current application. US. Patent (5,943,369) by Knutson et al. is a very close art. Knutson et al. teaches a timing recovery system comprises a loop filter couples with a microprocessor, which controls the loop filter coefficients. However, Knutson et al. failed to teach an average value of frequency error and details of how does the microprocessor controls the loop filter coefficients. Therefore, the current application overcome prior art by setting initial values of time loop parameters; measuring a frequency error; determining an average frequency error over time; subtracting the average value from the frequency error to produce a difference value; and controlling the loop filter parameters by the difference value comparing with a threshold value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
